Join us for the NJ Acts Biostatistics and Epidemiology Workshop Series:

Thursday, April 13, 2023 12:30pm – 2:00pm

Integrating Multi-omics Summary Data Using Mendelian Randomization

This workshop is designed for anyone interested in learning about Mendelian randomization, a versatile tool for using genetic variation to identify how an exposure affects an outcome in observational studies. The presentation will focus on the use of multi-omics summary data to prioritize genes associated with a disease outcome.

Presenter:

Chong Jin, PhD
Assistant Professor, Mathematical
Sciences at NJIT

Target Audience:

Everyone is welcome, especially those interested in genetic and genomic data analysis.
