

Master's of Science in Clinical Research Management

Academic Clinical Research Track

This track is especially designed for students with no clinical research or pharmaceutical experience who would like to participate in clinical research at an Academic Medical Center (AMC) functioning as a “study coordinator”. It covers the theory and application of research methods, basic statistics, regulatory and legal governances over clinical trials and the conduct of clinical research performed at research intensive institutions. Pathophysiology and pharmacological outcomes as well as project management, prepare the novice practitioner to become a Clinical Research Coordinator specializing in clinical operations at AMCs. Students are admitted each Fall and must attend full-time only, with curriculum extending over 4 semesters. Some of the courses are taught online and others are in-person. Experiential training is threaded through this track and may culminate with an offer to work in one of our clinical research units.

TO QUALIFY, STUDENTS MUST:

- Have a Bachelor's degree or higher with a minimum GPA of 3.0. No previous clinical research professional experience is required for entry
- Complete application form online
- \$70.00 application fee (non-refundable)
- Submit two letters of recommendation from individuals who can assess your professional ability and potential for successful graduate studies
- Submit a 250-word statement about your short-term and long-term career goals
- Official transcript from highest degree attained.
- The Graduate Records Examination (GRE) is not required
