

NJ ACTS Academy of Mentors

The Academy is comprised of faculty from Rutgers, Princeton, and NJIT based on 1) their recognized expertise in a key clinical/translational discipline; 2) their demonstrated commitment to clinical/translational research; and 3) their passion for contributing to the education/training of the next generation of clinical/translational sciences.

The Academy membership consists of two categories:

Preceptors are those faculty who have the qualifications to act as Thesis Mentors to our students or as Primary Research Mentors to our postdoctoral trainees (including expertise, funding, and training record; or, for more early-career faculty, strong potential for excellence in training). Preceptors are expected to play an active role during the course of the award by fostering the Fellow's career development as a translational/clinical scientist. They are expected to act as advocates for the Fellow at the departmental, institutional and professional levels and provide scientific guidance for the proposed project.

Advisors are those faculty who may not have all of the qualifications to act as mentors, but who bring a critical skill set to their training (eg. expertise in human disease, epidemiology, design and execution of clinical trials, biostatistics, informatics, career development, etc.). Industry partners who will contribute to educating our trainees about key issues in drug development, regulatory considerations and commercialization also fall into this latter category.

All research preceptors for TL1 Fellows must be members of the **NJ ACTS Academy of Mentors**. *(Preceptors who are not currently members of the Academy can apply for membership prior to the NJ ACTS fellowship application deadline. Please contact Anda Cytroen, at Anda.cytroen@rutgers.edu for details).*

In addition to his/her research preceptor, each TL1 Fellow will establish a Mentoring Committee that includes faculty whose translational or clinical research expertise is pertinent to the research project and will supplement that of the research preceptor.
