The New Jersey Alliance for Clinical and Translational Science

Announcements, Deadlines, Reminders

May 20, 2021

SAVE THE DATE

FIRST ANNUAL NJ ACTS SYMPOSIUM:
TRANSLATIONAL MEDICINE AND SCIENCE

September 22nd from 12-4:00 and September 23rd from 8-12:00.

Session topics and a call for abstracts for talks and posters will be issued shortly.

National Clinical Trials Day

May 20, 2021

Join us in....

Thanking...all the patients and health volunteers to participate in clinical research without who advances in the diagnosis and treatment of disease and improvements in individual and community health would not be possible.

Celebrating....all the research nurses, coordinators, research assistants, and other front-line research study staff who dedicate themselves to ensuring participant safety, conducting trial activities in compliance with the protocol requirements, and delivering clean data to support ground-breaking analyses.

Recognizing...all the administrative and financial staff who manage clinical study contracting, budgeting, compliance, management, and organization whose efforts create the infrastructure and support services required for clinical research.
Saluting... all clinical investigators who lead research studies, intent on improving the health outcomes for patients in their care by conducting innovative research and publishing the results to disseminate the results widely.

To everyone involved in clinical research, we thank, celebrate, recognize and salute all of you! While your efforts are appreciated all the time, you achieved spectacular results in meeting the challenges of COVID-19. The advances pioneered at Rutgers and the national studies, including vaccine trials, in which we participated, were only possible thanks to the partnership of patients, volunteers, clinical research staff and investigators, the IRB, the CTO and all others in supporting roles.

Internship Opportunity at Innovation Ventures

TechAdvance Student Internship Program

TechAdvance, an early-stage technology funding program that accelerates the commercialization of Rutgers Researchers’ inventions, invites applicants to apply for a 1-year internship program beginning July 2021.

This is an excellent opportunity for current students to explore a career that requires broad scientific knowledge, basic business insight and acumen to recognize potential research proposals moving into the commercialization phase. To learn more about the TechAdvance gap funding program, review the link: https://research.rutgers.edu/techadvance.

CLIC Un-Meeting

Exploring the Inclusion of Community Hospitals in Clinical Research

Thursday, May 27, 2021

CLIC will host a virtual Un-Meeting in which participants will discuss how to work with community hospitals when preparing for a future public health emergency, when recruiting for academic clinical trials and when working to increase participant diversity in clinical trials. This Un-Meeting is a half-day attendee-driven event, with time devoted to sharing ideas, developing relationships and identifying opportunities for collaboration.

Info & Registration: https://clic-ctsa.org/events/un-meeting/exploring-Inclusion-Community-Hospitals

Date: May 27th, 2021
DO YOU NEED HELP IN DEVELOPING YOUR HUMAN SUBJECT RESEARCH PROTOCOL?

NJ ACTS has established a RBHS-wide Scientific Review Board (SRB) comprised of members with a broad range of clinical research expertise to advise faculty in the development of their investigator-initiated clinical research protocols including an evaluation of their scientific merit, feasibility, and quality.

The goal of the SRB is to help faculty develop high quality research protocols for submission to the IRB that culminate in more efficient implementation of clinical research studies.

Priority will be given to junior/mid-career faculty who have external funding, or who are seeking funding for their human subject research projects and would like assistance with developing well-designed clinical research protocols.

For more information contact the NJ ACTS Regulatory Support Team at njactsregulatory@rbhs.rutgers.edu.

Free NIH Seminars for Clinical Researchers

Sex and Gender in Research

Interest in sex and gender in research—and resources to help investigators—is growing. In the 5 years since NIH enacted its pioneering Policy on Sex as a Biological Variable (SABV) there has been a lot of activity, including increased attention on sex differences and influences and many questions and requests for assistance.

The NIH Office of Research on Women’s Health (ORWH) has issued two new courses, Sex as a Biological Variable: A Primer and Bench to Bedside: Integrating Sex and Gender to Improve Human Health.

Click here to see the entire NIH suite of free e-learning offerings.

The Pfizer/Biontech COVID-19 Vaccine Pediatric Study
Recruiting now at RWJMS Pediatric CRC

Rutgers Pediatric CRC is soliciting participants for the Pfizer COVID-19 pediatric vaccine clinical trial. Please see flyer for details.
NJ ACTS Workforce Core

Mentoring Seminar Series

Tuesday, June 22, 2021

Interested in Mentorship Training?

The NJ ACTS Workforce Development Core is pleased to share its collaboration with Rutgers Biomedical Health Sciences Faculty Affairs and are hosting an interactive session

Empowering Mentors of Clinical and Translational Scientists

Presenters:
- M. Maral Mouradian MD, RBHS Vice Chancellor for Faculty Development
- Andrew Gow, PhD, Professor, Ernest Mario School of Pharmacy
- Anita Siu, PharmD, BCPPS, Clinical Professor, Ernest Mario School of Pharmacy

Tuesday, June 22, 2021

11a-1pm

NJ ACTS Team Science Seminar Series

June 21, 2021

NJ ACTS Team Science Core

Presents

Kate Sasser, PhD
Senior Vice President
Head of Translational Research
Second Event of Teamwork Seminar Series:
“Secrets of Successful Teamwork:
What Can Academia Learn from Non-Academia?”

Monday, June 21, 2021
2:30 – 3:30 PM

Register in advance for this zoom meeting:
https://rutgers.zoom.us/meeting/register/tJArfuqurDIrGdC17htqVIlc4R_TaVLiqmi5
After registering, you will receive a confirmation email containing information about joining the meeting.

For further information, contact: Kristi Parker parkerkn@cej.rutgers.edu

Updated Biosketch and Other Support

For due dates on or after May 25, 2021

Beginning with deadlines on and after May 25, 2021, NIH requires all applicants to submit biosketches that address the new requirements for the Personal Statement, Scientific Appointments and Scholastic Appointments.

Other Support has also been changed, requiring additional, detailed information on all current and pending support and the applicant’s signature. The NIH has provided a sample that applicants can follow when requested to submit Other Support.

Are you interested in collaborating across the RWJBH system or conducting studies at RWJBH facilities?

We encourage all RBHS faculty, undertaking clinical studies, to consider extending those studies to other sites across the RWJBH system. The RBHS Clinical Trials Office can provide coordination with RWJBH and the individual clinical sites to make the processes and approvals required for such collaborations smoother and easier.

If you have questions about collaborating with RWJBH, or if you have a plan to collaborate, you are urged to contact Nancy Reilly, Executive Director of the Clinical Trials Office, as early as possible in the process. reillyna@rbhs.rutgers.edu
NJ Workforce Development Core

Grant Writing Group

The NJ ACTS Workforce Development Core runs a monthly grant writing program with two trained Grant Coaches, Drs. Lauren Aleksunes and Suzie Chen, from the Ernest Mario School of Pharmacy.

Both coaches are trained by the National Research Mentoring Network-CIC Academic Network, a collaborative Big Ten NIH grant offering professional development grantsmanship coaching, and mentor skills training in biological, clinical, environmental, and social/behavioral sciences.

Are you a postdocs or junior/mid-career faculty interested in this program? Contact Dr. Aleksunes at aleksunes@eohsi.rutgers.edu

To read more about the Grant Writing Program visit NJ ACTS

Introducing the New Jersey Practice-Based Research Network

June 3-4, 2021

The New Jersey Practice-Based Research Network is a new initiative to increase the presence of New Jersey clinical practices in academic research. Join us to mark the launch of the network, bringing together clinicians, researchers, and leaders across the country.

DAY 1: 10 am - 1 pm ET Thursday, June 3, 2021
Welcome:
XinQi Dong, MD, MPH, Director, Rutgers Institute for Health, Health Care Policy and Aging Research & Henry Rutgers Distinguished Professor of Population Health Sciences

Keynotes:
• Shereef Elnahal, MD, MBA, President & CEO, University Hospital Newark & former commissioner, New Jersey Department of Health
• Andy Anderson, MD, President & CEO, RWJBH Medical Group

DAY 2: 10 am - 1 pm ET Friday, June 4, 2021
Welcome:
• Ann M. Nguyen, PhD, MPH, Director, NJPBRN
On the Pandemic – Podcast

Episode 10:
What to Expect this Summer

Host:
Mary Marchetta O'Dowd, MPH
Executive Director, Health Systems and Population Health Integration
Rutgers Biomedical and Health Sciences

Guest:
Perry Halkitis, PhD, MS, MPH
Dean and Professor, Biostatistics and Urban-Global Public Health
Rutgers School of Public Health

Hi Judy, I saw that too and had a pang of guilt that I didn’t think about doing anything.

I think that would be great. The only thing I can think of to possibly add might be some mention (maybe in that very first line before “Join us in:”) of this being a special year in particular because of all the work related to COVID-19, particularly vaccines?
Hi. I got this from D6. It reminds me that this occurs every year and next year (post-pandemic) we would do something across NJ ACTS to celebrate!

We are putting out a Current Events today. how about something like this?

At Deep 6 AI, we’re proud to help researchers at healthcare organizations better balance clinical care with clinical research, enabling you to offer research as a care option for your patients. We recognize that traditional feasibility assessment and patient recruitment methods are time- and resource-intensive. By applying artificial intelligence (AI) methods such as natural language processing to pull both structured and unstructured data from patient health records, the Deep 6 AI platform can precision match patients to trials in minutes, not months. Also, you can be certain you are taking on clinical trials that are the best fit for your organization and patient population.

To learn more about how our AI-based platform can help optimize your organization’s clinical trials and find research options for your patients, contact us today.
